

Postman
 ↳ run API without frontend.
 ↳ API Testing
 ↳ Documentation

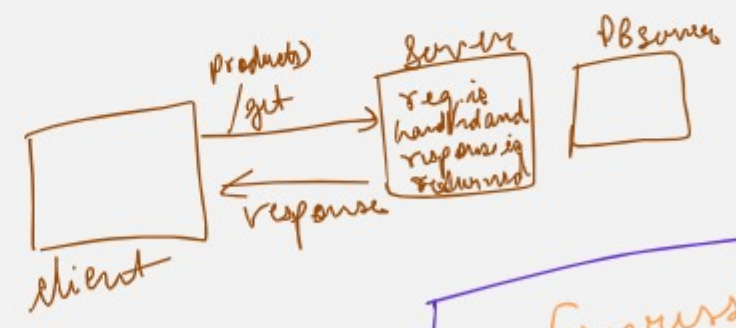

NodeJS
 ↳ Core Modules (http, fs, url, path)
 ↳ Third Party Modules (axios, lodash)
 ↳ Local Modules (import and export)
 ↳ creating your module/package

Express JS
 ↳ framework of NodeJS
 ↳ develop restful API

Inside ServerJS
 /get (emp) → return all emp. data (response)
 /get emp:id → return specific data (response)

Express
 ↳ framework of node
 ↳ restful API (status) / emp (resources)
 /emp:id / student
 ↳ inbuilt routing system
 ↳ High level abstraction (method) (get, post, put, patch, delete)

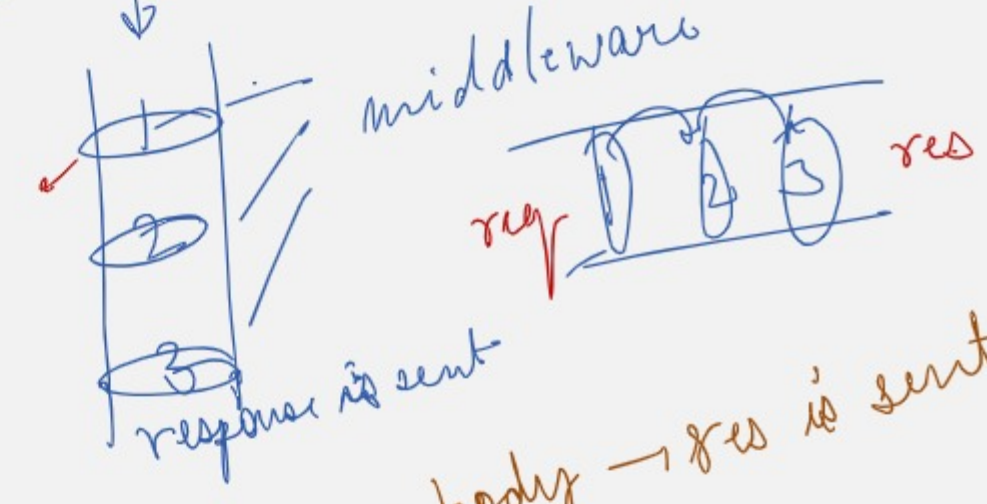

NodeJS
 ↳ Runtime Env
 ↳ API, service
 ↳ Scalable

↳ manually check url
 ↳ Low level, more code.

axios.get('')
 axios.post('', body)

Middleman

Http Request

body → res is sent
 expression!

Task

update
 put
 update/replace complete record.
 patch
 update the particular property
